

DESCRIPTION

Ready-to-use one-component paste screed mortar for interior floors and walls. MetalQuarz is a mortar of polyurethane resin, metallized mica and quartz, ideal as a complement to the MicroQuarz Classic, Hard Transit, Nature or Hybrid systems, with which, with the right mix of colors, shades of metallic colors, oxidized, rust effects for the renovation of interior floors and walls can be achieved with the right mix of colors.

MetalQuarz should be protected with Finish W TRP on walls or Finish W TRP RADIANT on floors.

Apply MetalQuarz as a decorative coat prior to the application of varnish protection.

It can be applied over any of the MicroQuarz products.

TECHNICAL DATA

Appearance: Paste

Max. inert diameter 0,1mm

Adhesion strength (N/mm²) >1,5

Wear resistance UM 80

Compressive strength 50N/mm²

Slip resistance Class 1

Consumption 0.4-0.7kg per layer

Maximum thickness 0,7mm

Trafficability after 8hs 8 hours

USE

Continuous decorative coating for interior floors and walls.

APPLICATION

Surface preparation: The substrate must be free of irregularities, clean, free of dust and incoherent parts. The substrates must be free of residual humidity, either by condensation or capillarity.

If the substrate has holes or imperfections, it is advisable to apply MicroQuarz Masilla to regularize. The cement substrates must be completely cured and free of moisture.

RECOMMENDATIONS TO BE TAKEN INTO ACCOUNT DURING THE APPLICATION PROCESS

It is essential to use protective goggles and gloves during the application and mixing process. If the product touches the eyes, wash them immediately with plenty of water and seek medical attention.

WARNINGS

- Do not use the product at -5oC and +30oC.
- Do not leave containers open for a long time.
- Do not use products that intervene in the system if they are not recommended in writing by Ecoresinas.
- Do not add water or additives to the product.
- Do not accelerate the drying process with heaters during the days after application until curing.
- Avoid the fall of solid remains in the container in case of successive use of the product.

CLEANING

The tools should be cleaned with water within 30 minutes of use, after which mechanical means should be used.

PRESENTATION

Available in 2,5kg, 5kg and 20kg containers.

STORAGE

MicroQuarz is stable for at least 12 months in its original containers in a dry and protected environment.

COLORS

14 colors on the color chart.
